

CURTIS CAPPUCCINO MACHINE:

Nightly Cleaning Instructions

1. Twist the dispensing spout on each hopper so that it faces the "up" position.
2. Remove all hoppers from the machine
3. Refill each hopper with the appropriate flavor.
4. Using a damp towel, wipe down the interior of the machine.
5. Close the machine door. Do not reinstall the hoppers at this time.
6. Place a 12oz cup under the left hopper.
7. Hold down the STOP/WASH button, then press the left "PUSH" button one time. Let go of the STOP/WASH button when the cup is 2/3 full with water.
8. Repeat Steps 6-7 for each remaining head.
9. Remove the drip tray from the machine and rinse inside a sink.
10. Re-install the drip tray after washing.
11. Open the machine door and install the hoppers.
12. Twist the dispensing spout on each hopper so that it faces the "down" position.

CURTIS CAPPUCCINO MACHINE:

Weekly Cleaning Instructions

1. Remove the top circular portion of the whipping chamber from each head.
2. Remove the middle portion of the whipping chamber from each head.
3. Remove the yellow dispensing tube from the bottom area of each head.
4. Remove the bottom portion of the whipping chamber by twisting it off.
5. The bottom portion of the whipping chamber consists of three pieces. Hold the clear tube in one hand and the green plate in the other.
6. Twist the clear tube until it separates from the green plate. This will also remove the whipper inside.
7. Wash, rinse and sanitize all of the whipping chamber parts and dispensing tube (6 pieces total).
8. To re-install, place the green plate onto the metal rotating stem. Twist the green plate to lock it in place.
9. Push the whipper onto the metal rotating stem. The whipper must fit snugly with the green plate.
10. Install the clear tube over the whipper by pushing in, then twisting to lock the tube in place. Be sure that the larger spout is facing up.
11. Attach the yellow dispensing tube to the bottom of the whipping chamber.
12. Install the middle portion of the whipping chamber by inserting this piece into the large tube.
13. Install the top circular portion of the whipping chamber into the oval-shaped hole and over the middle portion of the whipping chamber.
