

Cold Brew Coffee Concentrate Mixing Instructions

Traditional Cold Brew

Full Batch

- 1. Add one bottle (32 fl oz) of cold brew concentrate.
- 2. Using a 1 gal pitcher, add 1.5 gal (192 fl oz) of filtered/bottled water into the cold brew concentrate.

Half Batch

- 1. Add ½ bottle (16 fl oz) of cold brew concentrate.
- 2. Using a 1 gal pitcher, add 0.75 gal (96 fl oz) of filtered/bottled water into the cold brew concentrate.
- 3. Store remaining cold brew concentrate in the refrigerator after opening. Opened bottles have a 5 day shelf life.

Creamy Cold Brew
